

# Kevin Wynn

[kevin@robo-house.com](mailto:kevin@robo-house.com) • 720-667-6470 • Woodway, TX • <https://www.linkedin.com/in/lukevinskywynn/>

Senior full stack software engineer with over 15 years of professional experience working in various languages and frameworks. Involving frontend, backend, devops, and infrastructure roles.

## Skills

---

**Languages:** Typescript, Javascript, Node, Golang, Ruby, Java

**Frameworks:** React, Astrojs, React Native, Ruby on Rails, Prisma, Drizzle

**Infrastructure/DevOps:** Kubernetes, Helm, Terraform, CircleCi, Spinnaker, Gitlab CI/CD, Github Actions

**DB:** Postgres, MySQL, MongoDB

## Experience

---

**Cloudflare** • July 2021 – May 2026 | Senior Systems Engineer, Billing Platform, Marketing Engineering

*Typescript, AstroJS, React, Golang, Kubernetes, Helm, Gitlab, Teamcity, Terraform*

- Led design and implementation over our subscriptions management system that allowed customers to upgrade, downgrade, or change their subscription details.
- Implemented a drift management and translation layer that handled ensuring all data was consistent between Cloudflare's db and our 3rd party payment processing systems.
- Designed and built a failover manager to keep all billing platforms operational during any data center outages.
- Converted ci/cd pipelines from Teamcity to Gitlab ci/cd platform while also implementing argo canary rollouts.
- Rebuilt the [blog.cloudflare.com](https://blog.cloudflare.com) using Astrojs + React to be a server rendered site deployed with Cloudflare Pages.
- Rebuilt our build and deployment system for managing all content and static pages for the [cloudflare.com](https://cloudflare.com) website.

**StarshipHSA** • July 2020 – July 2021 | Senior Software Engineer, Infrastructure

*Typescript, React Native, Prisma, Postgres, AWS, Kubernetes, Helm, Github Actions, Terraform*

- Worked on implementing our infrastructure with Kubernetes, Helm, using AWS EKS. Standing up automated ci/cd pipelines to manage builds and deployments.
- Used React Native to build out onboarding flows and implement the investing platform allowing customers to invest HSA funds into stock options.

**YouEarnedIt/Kazoo** • September 2018 – July 2020 | Senior Software Engineer, SRE

*Typescript, Ruby on Rails, MongoDB, GCP, Kubernetes, Helm, CircleCi, Spinnaker, Terraform*

- Led and simplified architecture and engineering decisions to merge 2 companies by merging Heroku and AWS systems into a singular GCP kubernetes cluster, implementing CI/CD

**Homeadvisor** • November 2017 – September 2018 | Software Engineer

*Typescript, React, Java, MySQL*

- Implemented a new framework based on React and rearchitected our interview flow for customers.

**OutboundEngine** • April 2014 – November 2017 | Software Engineer

*Javascript, Java, MySQL*

- Built frontend applications to allow customers dynamic landing pages based upon profile details.

## Previous Life Experience (yes I was a chef)

---

**Atomic Design And Consulting** • January 2013 - April 2014 | Software Engineer

Wordpress, PHP

**Rebutton.tv** • October 2012 - January 2013 | Software Engineer, Photographer

Javascript, jQuery

**Fastsigns** • July 2011 - October 2012 | Graphic Designer

Adobe Illustrator, Adobe Photoshop

**Central 214** • September 2009 - July 2011 | Lead Cook, Sous Chef

Natural Gas, Beef, Fish
